PHASE 1

Phase 1 of this important project will be centered around Feasibility and Pre-design. This phase will aim to confirm the various needs of the groups, explore building sites and their feasibility in terms of existing infrastructure, environment, future development, future needs, costs, etc. In November Leadership provided various locations for the ground testing to be done. We are still in the very early stages of the projects. Ground testing was needed to determine if the locations would sustain the infrastructure. While we wait for the results we are looking to move forward with the community engagement sessions.

These sessions will provide information on the ongoing work that Awas'ak Wiyasiwewin is doing towards the new Child Family Services infrastructure, and provide membership with the opportunity to share their perspectives on what they would like to see.

Awasak Road map

Here is a detailed plan for the Awasak Infrastructure development, which will take place from October 2024 to 2032. Community involvement is a key part of this project, highlighting its significance to the outcomes. The process of acquiring services is divided into stages, starting with hiring consultants and then moving on to contractors. Some stages will happen at the same time, allowing for more efficiency in the overall timeline. The visual representation of the project clearly shows the plan, schedule, and current status, making it easy to understand.

In summary, this roadmap gives a broad view of a complex project, detailing the important phases, tasks, and timelines. It is a valuable resource for communication and tracking progress. We look forward to working with the members and the community. See you at the engagement sessions in March!
